

Trauma Nursing Core Course - 2019

Build a solid foundation in trauma nursing and become a more effective member of the trauma team. TNCC is an internationally standardized, interactive course that integrates the trauma nursing process into the content and provides the learner with core-leveled trauma knowledge and psychomotor skill experience. Maximize your knowledge, skills, and expertise in the following types of trauma: brain and craniofacial, abdominal, musculoskeletal, spinal cord and vertebral column, burn, pediatric, and pregnancy. All participants (RN, LVN, EMT-P) are eligible to receive 17.65 CECHs.
